EDUCATION

Washington University in St. Louis, St. Louis, MO Aug. 2013 – Aug. 2018
Ph.D. in Electrical Engineering
Advisor: Prof. Arye Nehorai

Fudan University, Shanghai, China Sept. 2009 – June 2013
B.S. in Electronic Engineering (GPA: 3.82/4.00, Top 3)
Advisor: Prof. Tao Yang and Bo Hu

EMPLOYMENT

Software Enginner Dec. 2018 – Present
Google LLC. Mountain View, CA

Graduate Research Assistant Aug. 2013 – Aug. 2018
Washington University in St. Louis St. Louis, MO

RESEARCH EXPERIENCE

Graduate Research Assistant Aug. 2013 – Aug. 2018
Washington University in St. Louis St. Louis, MO

- *Machine Learning for Graph-structured Data*
 - Collaborated with labmates on developing machine learning algorithms for graph-structured data with applications to node representation, link prediction, graph classification, etc.
 - Accelerated simulations using MEX and OpenMP, enabling the processing of large graphs over multicore servers, resulting more than 100x speed up compared with the pure MATLAB implementation.
- *Domain Adaptation Using Optimal Transport*
 - Collaborated with labmates on the theoretical derivations that enable cross-domain learning.
 - Developed tools to extract and process feature vectors from deep layers in VGG, AlexNet, etc.
- *Robust Direction Finding Using Sparse Linear Arrays*
 - Considered both the deterministic error model and the stochastic error model.
 - Derived closed-form asymptotic MSE expressions of SS-MUSIC for both error models.
 - Derived and analyzed the Cramér-Rao bound for the deterministic error model.
 - Implemented robust estimation algorithms using optimization toolbox and CVX.
- *Statistical Performance Analysis of Sparse Linear Arrays*
 - First to derive a closed-form asymptotic MSE expression for DA-MUSIC and SS-MUSIC.
 - Thoroughly analyzed the Cramér-Rao bound for general sparse linear arrays.
 - Successfully interpreted various unusual experimental results via the derived theorems.
 - Developed an open source MATLAB toolbox for array performance analysis.

Student Advisor for Undergraduate Research
Washington University in St. Louis

July 2016 – Dec. 2016
St. Louis, MO

- Guided two undergraduate research projects on microphone array applications.
- Provided hands-on tutorials on signal acquisition and processing using MATLAB.

Undergraduate Research
Fudan University

June 2012 – May 2013
Shanghai, China

- *LabVIEW-based Automatic Protein Refolding Control System Design*
 - Led a 3-student undergraduate research group and gave the final presentation.
 - Developed a user-friendly protein refolding procedure designer using WinForms in C#.
 - Developed hardware control and monitoring software using LabVIEW.

TEACHING EXPERIENCE

Teaching Assistant
Washington University in St. Louis

Sept. 2017 – Dec. 2018
St. Louis, MO

- Assisted the teaching of ESE 351 Signals and Systems.
- Held weekly recitation sessions for class of 30 students.

JOURNAL PUBLICATIONS

- [1] **M. Wang**, Z. Zhang, and A. Nehorai, “Grid-less DOA estimation using sparse linear arrays based on Wasserstein distance,” *IEEE Signal Process. Lett.*, vol. 26, pp. 838–842, June 2019.

TECHNICAL SKILLS

- 5 years of experience in numerical simulations, data modeling and analysis using MATLAB/Python.
- Familiar with other programming languages including C, C++, Java, C#, TypeScript, Assembly.
- Familiar with both Windows and Linux operating systems.
- Hands on experience with deep learning models. Familiar with PyTorch and TensorFlow.
- Experience in front-end development. Maintaining a personal website with >1k views per month.

TECHNICAL PROJECTS

- **doa-tools**: A MATLAB library for statistical performance analysis of linear arrays.
 - Implemented commonly used DOA estimation algorithms including MUSIC, ESPRIT, MVDR, etc.
 - Implemented functions for CRB and asymptotic MSE computations.
- **jasmal**: A numpy like framework for numerical computing in JavaScript.
 - Feature rich tensor library with built-in complex number support written purely in TypeScript.
 - Implemented broadcasting, numpy-like slicing, and advanced linear algebra operations (EVD, QR, etc.).
 - Developed more than 700 test cases to ensure the correctness of each operation.

HONORS AND AWARDS

- People's Scholarship 2011 - 2012
- SCSK Scholarship 2011 - 2012
- National Scholarship (Awarded to the top one student in the department) 2009 - 2010

EXTRACURRICULAR ACTIVITIES

Front-end Development Group Lead of STU Dec. 2010 – June. 2013
Fudan University Shanghai, China

- Responsible for the front-end development and maintenance of more than 3 Fudan students' websites.
- Collaborated with the back-end group and the design group to turn concepts into reality.
- Held regular workshops and presented new front-end technologies to group members.
